## Your challenges

Cutting-edge technologies for a new exciting project: as a Senior Full-Stack Engineer you will take care, and put into practice your expertise in the front-end and part of the back-end development of the customer's application. You will join an international team, discuss the customer's requirements and implement them sprint-based, you won't miss the chance to keep on learning as a professional and have fun in something, that we consider more than just a workplace.

## Your profile

- **Experience** as a Full-stack or Front-end Software Developer
- Also with **JavaScript, Vue.js, React, or Angular**
- Hands-on experience with **Object-Oriented Programming** languages like Java, .NET, or C#
- Methodical skills in **Scrum, Kanban, and DevOps**
- Experience with frameworks such as **Jasmine, Mocha or QUnit** and **Protractor**
- Familiar with **CI / CD** and **cloud platforms**
- Strong problem-solving as well as communication skills and independent working style
- Fluent knowledge of **English** and **Spanish**
- **Agile mindset**

## Reasons to choose Novatec

- **An international and diverse environment**
- **Flexible schedule** including working from home
- **Educational budget to take your personal and professional career to the next level**
- **English classes**
- **Interesting benefits package:** private healthcare insurance, mobile phone, parking, gym discounts, and many other corporate discounts
- Team events and a dedicated **fun budget**
- A cozy office in the city center to enjoy **fresh organic fruit, coffee,** and make sure to do not miss out on our special **Fridays' breakfasts**
- **Attractive salary** based on the experience of the candidate:
